Marcus Vinicius Ximenes

Staff Software Engineer
São Paulo, São Paulo, Brazil

Summary

I am a seasoned software developer with over 15 years of experience, well-versed in the entire product development lifecycle, from concept to launch.

I am passionate about writing clean code, adhering to SOLID principles, and practicing Test-Driven Development (TDD)

My expertise spans a variety of technologies, including .NET Core, Java, Node.js, Typescript, GraphQL, Angular (4+), React, and vanilla JavaScript

Additionally, I have experience as a technical leader, guiding architectural decisions, delegating tasks, and fostering knowledge-sharing within development teams.

Experience

Gupy
Staff Software Engineer
May 2025 - Present (3 months)
São Paulo, Brazil

The Luupe
Senior Software Engineer
April 2022 - Present (3 years 4 months)

- Member of the technology team of a startup company, responsible for creating and maintaining a global online platform and community of women and non-binary photographers who collaborate to provide diverse content for brands.

- Work as a software developer for the main company's product, in a multi cultural and highly autonomous team.

GRIN
Staff Software Engineer

December 2023 - April 2025 (1 year 5 months)

- Implemented microfrontend architecture using React in various applications at GRIN.
- Led a successful rewrite of Facebook integration, optimizing async data retrieval and API monitoring.
- Contributed to enhancing and fixing a large Laravel application, utilizing asynchronous events for handling large data volumes.
- Participated in architectural discussions and decision-making for modernizing a monolithic application, including the design and implementation of new services using a microservices architecture with Go.

ThoughtWorks

Lead Software Developer/Consultant

February 2019 - April 2022 (3 years 3 months)

São Paulo, São Paulo

- In my first consulting project, I joined a team building a digital bank that had been in development since 2018, focusing on credit card-related solutions. I contributed to a backend system built with Kotlin using a microservices architecture.
- Collaborated closely with client stakeholders as a backend developer to deliver new features aimed at enhancing the end-user experience.
- Championed agile methodologies and best development practices within the team.
- In a subsequent project, I worked with Brazil's largest cosmetics company.
- Took part in the planning and architecture of new frontend applications using a microfrontend strategy • Provided technical leadership to other developers through knowledge sharing, pair programming, and by helping resolve both technical and organizational challenges.

Itaú Unibanco

Solutions Architect

November 2018 - February 2019 (4 months)

São Paulo, São Paulo

- Member of the Solutions Architecture team of the largest Brazilian bank.
- Authored development guidelines to expedite application design efforts through ready-made frameworks.
- Customized in-development software to clients current hardware environments, designing applications to span multiple systems.
- Worked with developers and engineers to realize technological solutions.

- Created migration strategies to bridge development gaps between existing software architecture and future updates.

Netbiis is an Internet Software Company.

Software Developer

June 2017 - November 2018 (1 year 6 months)

São Paulo e Região, Brasil

Led early development of a labor compliance platform that helps businesses monitor employee breaks and prevent violations. Built the core backend with .NET Core and WebAPI, integrated Node.js services for background processing, and developed cross-platform mobile apps with Ionic, plus native Android features. Emphasized scalable architecture, real-time dashboards, and smooth integration with timekeeping systems.

Crossover for Work

Software Engineer

June 2016 - June 2017 (1 year 1 month)

- Software development focused on Unit testing and code quality improvement for many different projects written in C# and Java.
- Code-refactoring, unit test automation and unit hand-craft writing for legacy systems.

Digitalmed

Senior Software Developer

September 2012 - June 2016 (3 years 10 months)

São Caetano do Sul

- Member of the development team of a large medical laboratorial solution
- Responsible for many performance improvements and tech advice for new team members
- Development of a large and complex application using C#, ASP.Net (WebForms, MVC and Web.API), NHibernate, WCF, Windows Forms, Silverlight, Windows Services, tons of Javascript, jQuery, Angular JS, among others.

Adapt Solutions

.NET Developer/Analyst

January 2011 - September 2012 (1 year 9 months)

Santo André

- Developed and maintained a software used to manage public schools in a city.
- Responsible for development of a tool to generate dynamic reports using Asp.Net and Microsoft Report Definition Language, helping teachers and school managers to generate their own custom reports to support their decisions
- Worked on architecture definition and lead development for a new application used in medical care.

CWI Software

.Net Developer/ Software Developer

June 2010 - December 2010 (7 months)

- Outsourced developer working for a banking company, developing integrations between legacy systems and new applications being developed
- Development using SOA architecture, WCF as service stack and WPF as front end

Seeker Tecnologia

Web Developer/ .NET Developer

2008 - 2010 (2 years)

São Paulo e Região, Brasil

- Contributed to the development of a comprehensive human resources platform supporting end-to-end recruitment workflows for both candidates and recruiters.
- Designed and implemented an advanced Full-Text Search solution in SQL Server, significantly improving recruiters' ability to search and filter resume content stored in the database.
- Developed features using VB.Net and ASP.Net WebForms, backed by a SQL Server database, within a large-scale, enterprise-grade application.

Colsan - Associação Beneficiente de Coleta de Sangue

IT Support Analyst

January 2006 - August 2008 (2 years 8 months)

Windows 98/2000/XP support for internal company users. Execution of backup routines. Troubleshooting hardware and software.

Education

FATEC São Caetano do Sul - Antonio Russo

Tecnology, Information Technology, System Analisis, Software Development,
Computer Science · (2008 - 2011)
